A New Computing Book Series From ACM
ACM BOOKS

Published by ACM in conjunction with Morgan & Claypool Publishers, ACM Books is a new series of high quality, advanced level books for the computer science community.

Covering All Of Computing

ACM and Morgan & Claypool Publishers present ACM Books: an all-new series of educational, research and reference works for the computing community. Inspired by the need for high-quality computer science publishing at the graduate, faculty and professional levels, ACM Books is affordable, current, and comprehensive in scope. ACM Books collections are available under an ownership model with archival rights included. We invite you to learn more about this exciting new program.

For more information, please visit books.acm.org

Subjects

Algorithms & Complexity
Bioinformatics
Cloud Computing
Computer Graphics
Data Management
History of Computing
Human-Centered Computing
Information Retrieval & Digital Libraries
Machine Learning & Data Mining
Mobile Computing
Multimedia Systems
Networking & Communications
Parallel Computing
Programming Languages
Security & Privacy
Social Computing
Software Engineering
Spatial & Geographic Information Systems
Web Technology & Science

with additional subjects to follow
ACM Books will fill a unique space in the publishing domain. The series will include books from across the entire spectrum of computer science subject matter. The series will initially focus on four kinds of books: graduate level textbooks, deep research monographs that provide an overview of established and emerging fields, practitioner level professional books, and books devoted to the history and social impact of computing.

Readers can trust ACM Books to reflect ACM’s ongoing commitment to:

• High-quality research
• Affordable pricing
• Long-term preservation of content
• Digital-first publication
COLLECTION I TITLES (25 Titles)

Published Titles
Ada’s Legacy: Cultures of Computing from the Victorian to the Digital Age
Andrew Russell and Robin Hammerman
DOI: 10.1145/2809523

An Architecture for Fast and General Data Processing on Large Clusters
By Matei Zaharia
ISBN: 978-1-97000-157-0
DOI: 10.1145/2886107

Candidate Multilinear Maps
By Sanjam Garg
DOI: 10.1145/2714451

Communities of Computing: Computer Science and Society in the ACM
By Thomas J. Misa
DOI: 10.1145/2973856

Computational Methods for Protein Complex Prediction from Protein Interaction Networks
By Srigaresh Srijani, Chen Han Yong, and Limsoon Wong
DOI: 10.1145/3064650

Edmund Berkeley and the Social Responsibility of Computer Professionals
By Bernadette Longo
ISBN: 978-1-97000-139-6
DOI: 10.1145/2787754

Embracing Interference In Wireless Systems
By Shyamnath Gollakota
ISBN: 978-1-62705-474-4
DOI: 10.1145/2611390

A Framework For Scientific Discovery Through Video Games
By Seth Cooper
ISBN: 978-1-62705-504-8
DOI: 10.1145/2625848

The Handbook of Multimodal-Multisensor Interfaces, Vol. 1
By Sharon Oviatt, Phil Cohen, Björn Schuller, Daniel Sonntag, Gerasimos Potamianos and Antonio Krüger
ISBN: 978-1-97000-177-8
DOI: 10.1145/2872585

Shared-Memory Parallelism Can be Simple, Fast, and Scalable
By Julian Shun
ISBN: 978-1-97000-191-4
DOI: 10.1145/3018787

Smarter Than Their Machines: Oral Histories Of Pioneers In Interactive Computing
By John Cullinane
ISBN: 978-1-97000-191-4
DOI: 10.1145/3018787

The VR Book: Human-Centered Design for Virtual Reality
By Franck Barbier
DOI: 10.1145/3015783

Verified Functional Programming In Agda
By Aaron Stump
DOI: 10.1145/2841316

Forthcoming Titles
Algorithms And Methods In Structural Bioinformatics
By Nunt Hostel

Data Cleaning
By Ihab Ilyas
ISBN: 978-1-97000-144-0

Database Replication
By Bettina Kemme
ISBN: 978-1-97000-129-7

Declarative Logic Programming: Theory, Systems, and Applications
By Michael Kifer and Yanhong Liu

Empirical Software Engineering
By Dag Sjöberg
ISBN: 978-1-97000-121-1

Machine Learning and Optimization Methods for Protein Bioinformatics
By Jinbo Xu
ISBN: 978-1-97000-161-7

Principles of Graph Data Management and Analytics
By Amol Deshpande and Amarnath Gupta
ISBN: 978-1-97000-104-4

Software Evolution: Lessons Learned From Software History
By Kim Tracy

Tangible And Embodied Interaction
By Brygg Ullmer, Ali Mazalek, Orit Shaer, and Caroline Hummels
ISBN: 978-1-97000-141-9

The Continuing Arms Race: Code-Reuse Attacks and Defenses
By Thorston Holz, Per Larsen, and Ahmad-Reza Sadeghi
ISBN: 978-1-97000-180-8

The Handbook of Multimodal-Multisensor Interfaces, Vol. 2 and 3
By Sharon Oviatt, Phil Cohen, Björn Schuller, Daniel Sonntag, Gerasimos Potamianos and Antonio Krüger
Volume 2
Volume 3
ISBN: 978-1-97000-173-0

Plus additional titles for Collection I under development.
ACM Books pricing is based on an ownership model that provides archival rights for customers purchasing the entire collection of ACM Books, with the ability to locally host individual titles for internal use at the discretion of the purchasing institution.

Collection I, consisting of 25 books, will cover a wide range of topics in computer science. When an institution purchases Collection I, access will be turned on in the ACM Digital Library for all books published as of that date in Collection I. As new titles are published inside the ACM Digital Library, those titles will be accessible to all users within the institution’s IP authenticated domain.

ACM Books pricing is provided in US Dollars and is based on several factors:
• Institution Type: Academic, Corporate or Government
• ACM Digital Library Tier (for Academic)
• Single or multi-site access
• Consortium discount (if applicable)
• Pre-publication discount (if applicable)

**Academic Institutions**

<table>
<thead>
<tr>
<th>Tier 1</th>
<th>Tier 2</th>
<th>Tier 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>$1,500</td>
<td>$2,500</td>
<td>$4,000</td>
</tr>
</tbody>
</table>

* To determine which tier your institution is classified as by ACM, please contact ACM at acmbooks-info@acm.org

**Government Institutions**

Government List Price = $2,500 per site with discounts available for multi-site purchases

**Corporations**

<table>
<thead>
<tr>
<th>Tier 1</th>
<th>Tier 2</th>
<th>Tier 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>$2,500</td>
<td>$3,500</td>
<td>$4,500</td>
</tr>
</tbody>
</table>

* Tiering is based on annual revenues for the purchasing corporation. Tier 1 is for all corporations with $0-$99m in annual revenues. Tier 2 is for all corporations with $100m-$500m in annual revenues. Tier 3 is for all corporations with over $500m in annual revenues.
